# COMPACT SERIES Rough Terrain SCISSOR LIFTS

Skyjack's Compact Series Rough Terrain Scissor Lifts offer the same industry leading rugged, robust, and reliable scissor lifts that have made Skyjack famous.

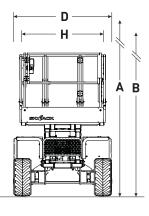

The SJ 6826RT and SJ6832RT both come equipped with an exclusive cross over symmetrical 4WD system for superior traction. Featuring up to 50% gradeability, these machines can meet the needs of the most challanging job site terrain. Standard features also include an easy to use 1,5 m roll out extension deck, which can be secured in multiple positions for increased platform space and improved reach capabilities.

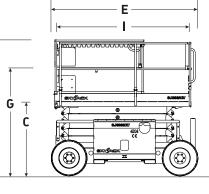

Both Compact models are drivable at full height with the roll out deck fully extended. A low stowed height is ideal for loading and unloading tools and materials.

Consistent with Skyjack's robust and reliable design features, the Compact Series Rough Terrain Scissor Lifts utilize Skyjack's standard colour coded and numbered wiring system with analog based controls.
